

PROPOSAL 2

Student Name: Kathy Catherine Kandala

Student Number:ST10544780

Organisation Name: Baked by B

Baked by B

Baked by B was founded from a passion for baking and a love for creating desserts that bring people together. What started as baking for family and friends soon grew into a small home-based bakery after the quality, creativity, and taste of the baked treats received positive feedback. Today, Baked by B specialises in freshly baked cakes, cupcakes, cookies, and a variety of sweet desserts for birthdays, weddings, baby showers, graduations, and many other special occasions. Every order is carefully prepared using quality ingredients, with the aim of making every celebration a little sweeter and every customer feel valued

Mission Statement

The mission of Baked by B is to create fresh, high-quality baked goods that bring joy to every celebration. We are committed to using quality ingredients, providing excellent customer service, and creating beautifully crafted treats that make every customer's special occasion memorable.

Vision Statement

The vision of Baked by B is to become a trusted and well-known bakery recognised for creativity, quality, and exceptional customer service. We aim to grow our business while continuing to make every celebration sweeter with delicious and beautifully crafted baked goods.

Target Audience

Baked by B is designed for individuals, families, and businesses seeking beautifully crafted, high-quality baked goods for birthdays, weddings, baby showers, graduations, corporate events, and other memorable occasions. The bakery welcomes customers of all ages who appreciate fresh, delicious desserts made with care.

Website Goals and Objectives

The main goal of the Baked by B website is to create a professional online presence where customers can discover the bakery, explore the wide range of freshly baked products, view special offers, learn about the services available, and easily find contact information. The website will provide customers with a simple and enjoyable way to browse the bakery's products and make enquiries or place orders.

The website will also help increase brand awareness, attract new customers, build trust, and strengthen relationships with existing customers. The success of the website will be measured by the

number of website visitors, customer enquiries, orders received, and returning customers. An increase in these areas will indicate that the website is successfully supporting the growth of Baked by B.

Current Website Analysis

Baked by B currently operates without an official website. Customers place orders mainly through social media platforms and WhatsApp. While these platforms are useful for communication, they do not provide customers with one place to view products, learn about the bakery, or access important information. An official website will improve the business's online presence and make it easier for both new and existing customers to interact with the bakery.

Strengths

- Freshly baked, homemade products made with quality ingredients.
- Custom cakes and desserts for a variety of occasions.
- Friendly, reliable, and personalised customer service.
- Strong customer relationships through social media and WhatsApp.

Weaknesses

- No official website to showcase the bakery.
- Customers cannot easily browse the full product range.
- Limited online information about products, prices, and services.
- New customers may find it difficult to learn about the business.

Areas for Improvement

Developing an official website will provide customers with one convenient place to explore Baked by B. Visitors will be able to browse products, view cake designs, learn more about the bakery, discover special offers, place enquiries, and find contact information quickly and easily. The website will also strengthen the bakery's online presence, improve customer experience, and help attract new customers while supporting the continued growth of the business.

Proposed Website Features and Functionality

The Baked by B website will be designed to provide customers with an easy and enjoyable browsing experience. Each page will have a clear purpose, allowing visitors to quickly find the information they need and learn more about the bakery's products and services.

- **Home**

The Home page will welcome visitors to Baked by B and introduce the bakery. It will showcase featured baked goods, highlight the bakery's passion for quality, and encourage visitors to explore the rest of the website.

- **About Us**

The About Us page will share the story of Baked by B, including the bakery's history, mission, vision, and values. This page will help customers learn more about the business and build trust in the brand.

- **Products**

The Products page will display a selection of freshly baked cakes, cupcakes, cookies, and other desserts. Each product category will include images, descriptions, and starting prices to help customers choose the perfect treats for their special occasions.

- **Special Offers**

The Special Offers page will keep customers informed about current promotions, seasonal discounts, and limited time deals available at the bakery.

- **Custom Orders**

The Custom Orders page will explain how customers can request personalised cakes and desserts for birthdays, weddings, baby showers, graduations, and other celebrations. It will also provide information about the ordering process and customisation options.

- **Contact Us**

The Contact Us page will include the bakery's contact details, social media links, business hours, and a contact form where customers can send enquiries or request more information.

Website Functionality

The website will include a navigation menu on every page, making it easy for customers to move around the website. High-quality product images and detailed descriptions will help visitors explore the bakery's offerings, while clear contact information will make it simple to place orders or ask questions. The website will be designed to provide a user-friendly experience and encourage customers to return.

Design and User Experience

The Baked by B website will have a simple, clean, and easy-to-use design. Each page will have clear headings, readable text, and high-quality images to help customers learn more about the bakery and its products. The website will use a consistent layout on every page to make browsing simple and organised. A navigation menu will appear at the top of every page, allowing visitors to move easily between the Home, About Us, Products, Special Offers, Custom Orders, and Contact Us pages. Product images and descriptions will help customers explore the bakery's products, while the simple layout will ensure that information is easy to find and understand.

Technical Requirements

The Baked by B website will be developed using HTML in Visual Studio Code. The website will consist of multiple linked web pages, images, and a navigation menu to allow users to move easily between pages. If the business decides to publish the website online in the future, a domain name and web hosting service will be required.

Timeline and Milestones

DAY	Activity
Day 1	Research the business, gather the required information, and complete the website proposal
Day 2	Create the Home page and About Us page, including the navigation menu and images.
Day 3	Develop the Products page by adding product categories, descriptions, prices, and images
Day 4	Create the Special Offers page and the Custom Orders page.
Day 5	Develop the Contact Us page and ensure all pages are linked correctly
Day 6	Test the website, fix any errors, make final improvements, and submit the completed project.

Budget

ITEM	ESTIMATED COST
Domain name (per year)	R250
Web Hosting (per year)	R1 200
Website development	R5 000
Website maintenance	R300 per month

Budget Explanation

The estimated budget includes the cost of registering a domain name, purchasing web hosting, developing the website, and maintaining it after it has been launched. Although this project is being developed for academic purposes, these costs reflect realistic expenses that a small business like Baked by B could expect if the website were published online.

The proposed Baked by B website will provide the bakery with a professional online presence where customers can learn about the business, browse products, view special offers, request custom orders, and find contact information. The website will improve customer experience, increase the bakery's visibility, and support the continued growth of the business.

CURRENT WEBSITE ANALYSIS

To gain more ideas for the proposed baked by b website, I analysed a similar website called Tessa's Bakery([Home - Tessa's Bakery](#)). The website had a modern, colourful and welcoming design that immediately captures the visitor's attention with high-quality and colourful images of baked treats and cakes. It is well organised and allows customers to easily browse products, learn about the bakery, request custom cakes and find contact information. The website also tells the bakery story, helping people viewing the website connect more with the brand. (Tessa's Bakery, n.d.)

STRENGTHS

- Attractive and professional website design
- Clear navigation menu that makes the website easy to use
- High-quality images that showcase the business products and what they offer
- Separate sections for cakes, cupcakes, cookies, and custom orders
- Included contact information
- Shares the bakery's story, helping customers build trust in the business

Weakness

- Product prices are not displayed for all items, so customers may need to contact the bakery for quotations
- The website contains a lot of information, which may require visitors to scroll to find specific details

Very few weaknesses were identified, as the website is easy to navigate, visually appealing and provides customers with the information they need.

Areas for Improvement

The Baked by B website is proposed to offer a simple, welcoming and user-friendly online experience showcasing various baked products and services. Baked by B is inspired by the professionalism in design and organisation of Tessa's Bakery. Baked by B aims to create a website that can provide customers with the same level of convenience, trust and ease of navigation. The website will give customers the ability to browse products, view prices and special offers, place custom order enquiries and quick access to contact information. With the growth of the business, the website aims to be a reliable online source that reflects the quality and professionalism of well-established bakeries like Tessa's Bakery.
